PROFESSIONAL SUMMARY

Entry-level software developer with hands-on experience building and deploying full-stack personal projects using JavaScript, Node.js, Express.js, MySQL, and Sequelize. Developed REST APIs, authentication, database transactions, real-time communication, cloud integrations, background jobs, and API validation. Eager to learn new technologies and contribute to implementation, integration, and high-quality software through Google's Software Application Development Apprenticeship.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | Graduated: 2021

Guru Jambheshwar University of Science and Technology, Hisar

TECHNICAL SKILLS

Programming: JavaScript (ES6+), SQL, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT, bcrypt, scheduled jobs

Databases: MySQL, Sequelize ORM, migrations, transactions, pagination, indexing

Testing and Quality: Postman API testing, input validation, error handling, Winston logging

Cloud and Tools: AWS S3, AWS RDS, AWS EC2, PM2, Jenkins CI/CD, Git, GitHub

SOFTWARE DEVELOPMENT PROJECTS

Salon Appointment Platform

Jul 2026 - Present

JavaScript, Node.js, Express.js, MySQL, Sequelize, JWT, Cashfree, Brevo

- Built customer, staff, and admin workflows with dynamic slot calculation using service duration, staff availability, and existing bookings; supported booking, rescheduling, cancellation, and reviews.
- Integrated JWT/cookie authentication, Cashfree sandbox payments, Brevo confirmation and reminder emails, and Sequelize transactions for multi-step appointment workflows.

Group Chat Application

Sep 2025 - May 2026

JavaScript, Node.js, Express.js, Socket.IO, MySQL, Sequelize, AWS S3

- Built authenticated personal and group messaging with Socket.IO rooms, persistent MySQL storage, and server-side membership checks before group-message delivery.
- Added AWS S3 media sharing and a scheduled archival job that moves messages older than 24 hours to a separate table to keep active-message queries focused.

Daily Expense Tracker

May 2025 - Sep 2025

JavaScript, Node.js, Express.js, MySQL, Sequelize, AWS, Cashfree, JWT

- Developed expense tracking with JWT/bcrypt authentication, pagination, transactional create/delete flows, password-reset emails, premium payments, and AWS S3 report exports.
- Deployed on AWS EC2 with MySQL on RDS, PM2, Jenkins CI/CD, and Winston logging; optimized leaderboard reads by maintaining per-user expense totals.
