DEEPAIN SAINI

deepainsaini111@gmail.com | +91 96499 90222 | github.com/DeepainSaini

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building and deploying backend-focused web applications using JavaScript, Node.js, Express.js, MySQL, Sequelize, and AWS. Built REST APIs, authentication, database transactions, real-time messaging, payment workflows, file storage, background jobs, logging, and API validation. Comfortable using Git/GitHub branch, pull, push, and merge workflows, breaking features into tasks, testing APIs with Postman, and learning quickly across ambiguous requirements.

EDUCATION AND TRAINING

Bachelor of Technology in Computer Science and Engineering | **Graduated: 2021**

Guru Jambheshwar University of Science and Technology, Hisar

Full Stack Development Program - Sharpener Tech | 1-year project-based training in JavaScript, Node.js, Express.js, MySQL, AWS, Git/GitHub

TECHNICAL SKILLS

Programming: JavaScript (ES6+), SQL, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT, bcrypt, scheduled jobs

Databases: MySQL, Sequelize ORM, migrations, transactions, pagination, indexing

Testing and Quality: Postman API testing, input validation, error handling, Winston logging

Cloud and DevOps: AWS S3, AWS RDS, AWS EC2, Nginx, PM2, Jenkins CI/CD

Tools and Collaboration: Git, GitHub, branching, pull/push/merge workflows, task management, Google Workspace

SOFTWARE DEVELOPMENT PROJECTS

Salon Appointment Platform — Jul 2026 - Present

JavaScript, Node.js, Express.js, MySQL, Sequelize, JWT, Cashfree, Brevo

- Built customer, staff, and admin workflows for appointment booking, dynamic slot calculation, availability and conflict checks, rescheduling, cancellation, reviews, and role-based access.
- Integrated JWT/cookie authentication, Cashfree sandbox payments, Brevo confirmation and reminder emails, and Sequelize transactions for multi-step booking and payment flows.

Group Chat Application — Sep 2025 - May 2026

JavaScript, Node.js, Express.js, Socket.IO, MySQL, Sequelize, AWS S3

- Developed authenticated personal and group messaging with Socket.IO rooms, persistent MySQL storage, and server-side membership checks before group-message delivery.
- Added AWS S3 media sharing and a scheduled archival job that moves messages older than 24 hours to a separate table to keep active-message queries focused.

Daily Expense Tracker — May 2025 - Sep 2025

JavaScript, Node.js, Express.js, MySQL, Sequelize, AWS, Cashfree, JWT

- Implemented expense tracking with JWT/bcrypt authentication, pagination, transactional create/delete flows, password-reset emails, premium payments, and AWS S3 report exports.
- Deployed on AWS EC2 with MySQL on RDS, PM2, Jenkins CI/CD, and Winston logging; optimized leaderboard reads by maintaining per-user expense totals.
